COI Species Report

Cell line: MMQ

ACC-No.: 484

Date of analysis: 13.10.2014

DNA processing number:

Methode: DNA Barcoding by PCR amplification of 5Â´coding region of cytochrome c oxidase I (658 bp fragment size). Cycle sequencing of respective PCR products revealed following assignment upon submission to BOLD (Ratnasingham, S., Hebert, P. D. N. (2007) BOLD: The Barcode of Life Data System (www.Barcodinglife.org). Molecular Ecology Notes, 2007; 7(3): 355-364

Taxonomic Level Taxon Assignment Probability of Placement (%)
Phylum Chordata 100
Class Mammalia 100
Order Rodentia 100
Family Muridae 100
Genus Rattus 100

Identification Summary:

Search Result: A species level match could not be made, the queried specimen is likely to be one of the following:

Rattus rattus

Rattus norvegicus
