COI Species Report

Cell line: IPEC-1

ACC-No.: 705

Date of analysis: 23.10.2014

DNA processing number: 10062

Methode: DNA Barcoding by PCR amplification of 5Â´coding region of cytochrome c oxidase I (658 bp fragment size). Cycle sequencing of respective PCR products revealed following assignment upon submission to BOLD (Ratnasingham, S., Hebert, P. D. N. (2007) BOLD: The Barcode of Life Data System (www.Barcodinglife.org). Molecular Ecology Notes, 2007; 7(3): 355-364

Taxonomic Level	Taxon Assignment	Probability of Placement (%)
Phylum	Chordata	100
Class	Mammalia	100
Order	Artiodactyla	100
Family	Suidae	100
Genus	Sus	100

Identification Summary:

Search Result: A species level match could not be made, the queried specimen is likely to be one of the following:

Sus scrofa

Sus scrofa taiwanensis
