

COI Species Report

Cell line: R-05T

ACC-No.: 754

Date of analysis: 13.10.2014

DNA processing number:

Method: DNA Barcoding by PCR amplification of 5' coding region of cytochrome c oxidase I (658 bp fragment size). Cycle sequencing of respective PCR products revealed following assignment upon submission to BOLD (Ratnasingham, S., Hebert, P. D. N. (2007) BOLD: The Barcode of Life Data System (www.Barcodinglife.org). Molecular Ecology Notes, 2007; 7(3): 355-364

Phylum Chordata 100

Class Mammalia 100

Order Chiroptera 100

Family Pteropodidae 100

Genus Rousettus 100

Species Rousettus aegyptiacus 100

Identification Summary:

Search Result: The submitted sequence has been matched to **Rousettus aegyptiacus**. This identification is solid unless there is a very closely allied congeneric species that has not yet been analyzed. Such cases are rare.
